

# STAT2120 Inference Methods

Below is a guide to (most) of the inference methods included in UVA's STAT2120: Introduction to Statistical Analysis.

1. [One-sample z-test for means](#)
2. [One-sample t-test for means](#)
3. [Two-sample z-test for means](#)
4. [Two-sample t-test for means](#)
5. [One-sample z-test for proportions](#)
6. [Two-sample z-test for proportions](#)
7. [Chi-square test for association](#)
8. [ANOVA F-test for SLR model usefulness](#)

If you're taking this in Spring 2020, you're allowed to access resources you have downloaded to your computer during the final. [Download this site here.](#)
